Hand Carved Unfinished Wood
Shown here in Maple, may need filling and minor sanding prior to staining. Use professional finisher craftsman.
Wood is a combustible material for applications where the material is not exposed to temperatures beyond 130 degrees F for extended periods of time.
Check with the firebox manufacturer for the heat created.
Wood Burner: Use Marble or Granite as inset panels.
Check local building codes for clearances between the mantel, granite & firebox.
All measurements are approximate only and may vary upon production.

* All specifications subject to change without notice. Final product & measurements and color of Signature Finishes may vary from this brochure. Due to manufacturing variances, consistency from order to order cannot be guaranteed. See website for Sales Terms and conditions, cleaning & heat advisory notes. FOB Buffalo NY, Toronto Canada
