# Custom Domes

## ***Design Tip: Noise Attenuation and Domes:***

All domes amplify noise! The shape, depth and material of a dome effects how noise is reflected by the dome. It is like a big satellite dish that amplifies sound waves. NeoPlaster-GRG is like drywall and has a higher degree of absorbing sound. Fiberglass is hard and noise bounces back from it especially high pitch sounds like heels on a marble floor in the same room that become amplified. Thus the material of choice for internal use is Neo-Plaster-GRG. Screw the segments to the framing, hang chains and affix to the embedded hooks. Tape & Mud the seams and plaster in place.

## **Exterior Custom Domes: (Fiberglass)**

Internal gaskets for weather proofing. Interior can be unfinished or custom finished. Submit drawings and sizes for pricing.
