A Solution for Deck Fascias & Gutters

Martin Richards Design
COLLECTION

As a designer I'm often asked how to create a facade where there is a gutter in front of a deck fascia. The front of a deck is a real problem because you need the water control but don't want the gutter to be prominent. Here is our solution. *Martin Richards Pres*

Black gutter as shown above - to be covered

<- IPNP4310

Looking down from the deck, we created a pressure treated wood frame to cover the gutter. It is open from above to be able to clear leaves but is out of sight from the front of the house.

IPNP4310

The open gutter framing is covered with the header IPNP4310, a keystone and decorative scrolls. This creates an inviting entry and functional deck without viewing the gutter.

Note:
Use ResinMold®
for Radius
Decks. Provide us
with a drawing and
profile.
Custom made as
per the radius.
