ResinMold® Flexible Moulding
Fill in Forms Circle, Arches, Curves

ResinMold® is a synaptic polymer with memory. There are 1000’s of profiles for curves, arches and circles. Everyone of our Casing, Brickmold, Baseboards, Panel Molds, Frieze can be made from ResinMold®. It comes primed ready to paint or stain with a gel stain.

Send us Tracing or photos for Moulding Matching

Arches are made as per the radius
Although it is flexible you cannot bend it in place without it splitting over time
Measure the radius from the inside of the arch

Eyebrow Arches are made as per the radius as well. You can order matching straight profiles for vertical casing needs

Complex Crown arches require special attention. Contact our Sales department for guidance

Note:
Minimum Radius 3 x the Width
ResinMold® Flexible Moulding
True Half Circle Arch

Elevation

A = Bottom Horizontal (Inside) _________________ A = H - (W x 2)

H = Outside Horizontal ________

R1 = Mid Rise (Inside) __________

R2 = Rise 1/4 way _______ D2 = __________

R3 = Rise 1/4 way _______ D3 = __________

W = Width Casing

Orientation of Moulding (circle)
A) High on Left       B) High on Right

How Many Arches: __________________

1) Open the ResinMold®
Lay it out and allow it to warm up if cold.
If made to a radius arch, it will form to the radius as the material has memory.
Check the measurements as per your order.

2) Pre-Finishing
Do not prefinish the material prior to installation.
The material may flex during installation and cause fractures in the finish.

3) Substrata Surface or Base
Since the material is flexible it will take the form of the base.
If there are concave or convex bows in the base the material will follow these imperfections.
Thus, the surfaces should be plum, clean, and even.

4) PreDetermine Placement or Layout
For angles, you can cut the material with any type of saw. Hold material firmly to table or fence when cutting.

5) Apply Adhesive
Use approved adhesive on back surface area.

6) Brad Nailer (do not use screws or nails)
When using a brad nailer try to affix them to indents or use the side of the moulding.
They will sink into the material but may leave a small indentation which can be easy filled later.

Caution:
Use a probe for any hidden electrical wires or water pipes inside the wall before brad nailing.

7) Allow to Dry then Paint
Once dried apply polyspackling compound for gaps between the wall and the moulding or joins between pieces.
The material is primed ready for paint or stain.

8) Paint or Stain
Once dried faux finish or paint

These notes are suggestions only - consult with a professional for installations of complex situations.
